Subject: RE: Victoria Park ESI report

Jere,

We have put together a packet of all of the requested items except for the survey data indicating the location/coordinates of the benchmark location used to reference all elevation data presented in the ESI report. If this is crucial, we could request this from the surveyor. I will send you a packet of the other items this afternoon. Let me know if there is anything else you need.

--Cheryl LeCompte

- 1) Field sampling forms for monitoring wells MW-2, -5, -7, and -8.
- Included
- 2) Chain-of-custody forms for all samples (specifically liquid samples).
- Included
- 3) A complete set of legible CPT logs from the GW- series of hydropunch/CPT investigation holes.
- Included in Presentation of Cone Penetration Test Data by Gregg In Situ, Inc.
- 4) A detail description of how the hydropunch/CPT water samples were collected.
- Also in the report by Gregg In Situ, Inc.
- 5) A full set of field notes from Roy F. Weston field staff.
- Included
- 6) Survey data indicating the location/coordinates of the benchmark location used to reference all elevation data presented in the ESI report.
- Not currently available

Jere - Bill Clarke, in WESTON's Sherman Oaks office, is the Project Manager for the VGC ESI. He lead the sampling event. He can be contacted at (818)349-2133 or CLARKEB@mail.rfweston.com. Bill is probably the best person to talk to about this. If Bill isn't able to address everything, Cheryl LeCompte, in the Walnut Creek office, is currently working on the VGC HRS Screening Memo. She can be contacted at (925) 975-0756 or Cheryl.LeCompte@mail.rfweston.com. -Kate

Subject: Victoria Park ESI report

Jere,

Per our previous conversation, I'm sending this email in order to request additional data that was not included in the ESI report that was sent to SCS Engineers previously.

Specifically, we are looking for the following items:

- 1) Field sampling forms for monitoring wells MW-2, -5, -7, and -8.
- 2) Chain-of-custody forms for all samples (specifically liquid samples).
- 3) A complete set of legible CPT logs from the GW- series of hydropunch/CPT investigation holes.
- 4) A detail description of how the hydropunch/CPT water samples were collected.
- 5) A full set of field notes from Roy F. Weston field staff.
- 6) Survey data indicating the location/coordinates of the benchmark location used to reference all elevation data presented in the ESI report.

Thanks for your help.

Ray
